

Alex Developer

Junior AI/ML Engineer | Python Expert

Professional Summary

Passionate Junior AI Engineer with strong proficiency in Python and Machine Learning. Experience building RAG pipelines using LangChain and Pinecone. Skilled in deploying models with FastAPI and Docker. Eager to join NexusFlow Tech to build FinTech AI solutions.

Technical Skills

- Languages: Python (Advanced), SQL, C++
- Machine Learning: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy
- GenAI & LLMs: LangChain, OpenAI API, Gemini, RAG, Pinecone, Prompt Engineering
- Deployment: Docker, Git, GitHub, FastAPI, Flask, AWS Basics

Projects

1. AI Financial Chatbot (RAG & LangChain)
 - Built a chatbot to answer customer queries using LangChain and OpenAI.
 - Implemented RAG (Retrieval Augmented Generation) with Pinecone vector DB.
 - Deployed backend using FastAPI and Docker.
2. Customer Churn Prediction Model
 - Preprocessed large datasets using Pandas and NumPy.
 - Trained Random Forest and Logistic Regression models (Scikit-learn).
 - Achieved 85% accuracy in predicting customer drop-offs.

Education

B.Tech in Computer Science
XYZ Institute of Technology (2022 - 2026)
CGPA: 8.5/10
